They catch char, or bull trout, that weigh from four to ten pounds. They are just as good cating as the regu-

look to you?" "Well, I am sorry to say, not bright. I am a Republean; I have voted the ticket since 1858. Mr. Mc-Kinley's record is all right. He voted t wice when in congres for free silver. No later than September, 1894, at Akron, Ohio, he declared 'I am for the double standard.' Since his nomination, however, he has only talked about 'tin' and kindred tariff subjects. He appears not to be aware of the fact that the restoration of silver to its position prior to 1873 as standard money is the issue before the American people. I hope he will come out in a clear and unmistakable declaration that he is in favor of the double or joint standard. The money plank in the St. Louis platform is all right; it declares in clear language in favor of bimetallism through an international agreement."

"I feel sure it is. When the Brussels conference met it could have been accoplished. But England stood in the way-four out of five delegates-Bertram, Curry, Rivers, Wilson, Alfred de Rothschild and Freemantle declared England would not agree to restore silver as standard money. But Rothschild predicted a panic, 'the like of which has never been seen, if something was not done by this conference for silver,' and it came, sure enough. So he offered a resolution for European nation, to buy and coin \$25,000,000 of silver annually, provided the Ueited States would continue to today. Petitions are circulated at Salem by Republican politicians asking Hon. H. L. Barkley noT To RESIGN. The people regardless of party lines should oppose this scheme of a faction of one party to dictate to a man who has kept his pledge to the people and who has never violated his oath of office in any particular.

Salem, now asking Mr. Barkley to resign, did all in their power in the June campaign to avoid a square issue in this state, on the very question over which they now demand this resignation.
